

# SUSTAINABLE TRAIL SCIENCE MICROCREDENTIAL

---

The Sustainable Trail Science microcredential is a 9-semester hour program that provides individuals with skills and knowledge necessary for pursuing jobs in outdoor recreation or land management agencies, making decisions about land management, leading volunteer crews, and regional trail advocacy.

Individuals who complete the microcredential may apply the coursework towards electives in the Geography major or towards an Integrated Studies major.

Requirements for the microcredential in Sustainable Trail Science are:

Course	Title	Credits
GY 208	Introduction to Digital Mapping and GIS	3
GY 304	Trail Building and Maintenance	3
Select one of the following:		3
GY 303	Outdoor Recreation in Natural Lands	
GY 401	Practicum in Geography	
SMR 470	Natural Resource Management in Tourism	
BY 303	Biological Conservation	
<b>Total Hours</b>		<b>9</b>
