

MANUFACTURING MANAGEMENT MICROCREDENTIAL

The microcredential in Manufacturing Management is a 6-semester hour program that provides students with the introductory skills and knowledge necessary for effective management of people and technology within the manufacturing enterprise.

Individuals who complete the microcredential may apply the coursework toward the Industrial Leadership, Applied Manufacturing Engineering - Manufacturing Management, or Occupational Safety and Health Management major.

Requirements for the microcredential in Manufacturing Management are:

Course	Title	Credits
AE 342	Employer-Employee Relations	3
AE 343	Engineering and Technology Management	3
Total Hours		6

Students must have sophomore standing or be a current employee with manufacturing experience for enrollment in AE 342 or AE 343.
